SUMMARY

Passionate about machine learning with strong background in mathematics, statistics and programming.

EDUCATION

M.Sc. in Statistics

Universidade de São Paulo and Universidade Federal de São Carlos (PIPGES USP/UFSCar)

📅 2019 - 2022

- Courses: Probability Theory, Regression Models, Statistical Inference, Statistical Learning, Algorithms of Machine Learning, Data Science, Dynamical Processes on Complex Networks, Research Topics.

B.Sc. in Applied and Computational Mathematics

Universidade Estadual de Campinas (IMECC - UNICAMP)

📅 2014 - 2018

- Most important courses: Linear Optimization, Non-linear optimization, Financial Mathematics, Algorithms and Programming, Data Structures, Computational Statistics, Probability, Statistical Inference.

PROFESSIONAL EXPERIENCE

Data Scientist

Boa Vista SCPC

📅 Jan 2023 - Ongoing

Data Scientist

Grupo SBF

📅 Apr 2022 - Jan 2023

Development of time series models and price optimization.

Data Scientist

Boa Vista SCPC

📅 Fev 2021 - Apr 2022

Development of credit scoring models, creating new features and backtest analysis.

PROJECTS

Masters degree research

Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (CAPES)

📅 2019 - 2022

My research focus was on machine learning methods for graph structured data. In the project we focus on the application of Graph Neural Network (GNN) models to study dynamical processes, such as rumor spreading on complex networks. We also investigate the potential of GNN models to perform community detection in graphs in an unsupervised way.

Chess Study Group

IMECC - UNICAMP

📅 2016 - 2018

In 2016 with some friends we created the *Chess Study Group of IMECC*. The group consisted of weekly study of chess theory and we also participate in some chess tournaments representing UNICAMP.

MOST PROUD OF

1st Place - University Chess Tournament in São Paulo state - 2017

First place in the chess tournament by teams in São Paulo state, representing UNICAMP.

3rd Place - University Chess Tournament in São Paulo state - 2016

Third place in the chess tournament by teams in São Paulo state, representing UNICAMP.

COMPLEMENTARY COURSES

- Workshop on modelling of infectious diseases dynamics, International Centre for Theoretical Physics, 2020.
- Musical Data Science, dealing with complex and heterogeneous data related to music, USP, 2020.
- VIII Workshop on Probabilistic and Statistical Methods, UFSCar, 2020.
- Workshop in Artificial Intelligence, Intel, USP - ICMC, 2019.
- Statistical analysis of networks and applications, CeMEAI, USP - ICMC, 2019.
- Introduction to data analysis and applications to complex systems, USP - EACH, 2019.
- Datacamp Courses: Introduction to R, Intermediate R, Writing Functions in R, Introduction to SQL for Data Science, Network Analysis in R, Supervised Classification in R, 2019.

SKILLS

Statistical Analysis

Machine Learning

Graph Machine Learning

Complex Networks and Graphs

Python

SQL

R

LANGUAGES

Native Portuguese

English
